

Walter Mpho Heisi

mphozazo@gmail.com

***Nationality**: South African*

Revised Profile : https://mphozazo.github.io/Walter-Heisi-Profile/

Executive Summary

With over **27 years of hands-on software engineering experience**, coupled with a strong background in **Microsoft full-stack development, system architecture, and technical leadership**, I am confident in my ability to lead high-performing engineering teams and deliver impactful enterprise solutions.

Throughout my career, I have built and led teams using **C#, .NET Core, MVC, Web API, Angular, SQL Server**, and legacy technologies such as **Delphi**, giving me a comprehensive understanding of both modern and mission-critical systems. I have successfully guided teams through complex SDLC processes—Agile, Scrum, and traditional waterfall—ensuring high-quality delivery, alignment with business goals, and continuous improvement.

My leadership approach is grounded in **mentorship, technical excellence, and collaboration**. I empower developers by fostering clean coding practices, architectural discipline, and strong DevOps principles. I am passionate about solving challenging business problems and implementing scalable, maintainable, and secure solutions using modern cloud and enterprise architectures.

I also place high importance on continuous learning and staying current with emerging technologies. Through platforms like **Pluralsight** and **Udemy**, I actively upskill in **cloud-native systems, AI/ML, modern .NET patterns, microservices, and distributed system design**—ensuring I bring forward-thinking engineering leadership to every role.

With a career built on innovation, reliability, and technical depth, I am excited about the opportunity to contribute and help your organisation deliver high-impact, future-ready software solutions.

Professional Background

Company: **Clientele Limited**
Period: **07 April 2025 to November 2025**
Position: **Snr Software Developer.**

- Support business system in sales department through system maintenance
- Building Rest API's for sales systems

Technologies: Azure DevOps, .Net / .Net Core / Agile / SQL /Rest API / Microservices/PowerShell/ Rest Api/ Postman/Angular
Reason for Leaving: Seeking an environment with stronger strategic planning and clearer communication structures.

Company: **Tshepang Business Solution**
Period: **1 Feb 2021 to 30 March 25**
Note : Contracted the Bank (standard Bank) & Government (Gems)
Position: **Snr Developer / Lead Developer**

- Porting VB Client Payment System to modern web UI MVC
- Writing excels macros into SQL DB table via VBA .
- Scripting process with PowerShell by downloading data and staging into SQL Server for reporting.
- Building new trading system to reports daily trades to Murex and BDA
- Integrating new sub-system to Bank LAM (Local Access Management) using api .
- Parallel programming with other developers within teams.
- Agile environment on both assignments
- Building microservices for the Government project
- Technical Lead

Technologies: Azure DevOps, .Net / .Net Core / Agile / SQL /Rest API / Microservices/PowerShell/ Rest Postman/VBA/jQuery/Bamboo/Bitbucket/Octopus/CRM/SharePoint/Azure Dev Ops /Ocelot/ Postman
Achievements: Converting Gems Monolithic applications to microservices.
Reason For Leaving: Contract Expired

Company: **MiPrint Consulting**
Period: **Sept 2019 to 30 Jan 2021**
Position: **Senior Software Developer**.

- Maintained and enhanced Standard Bank's StanSure motor insurance system.
- Modernized legacy VB.NET codebase by porting 80% to C# with API-based architecture
- 3rd Line support
- Developed SSRS reports for business intelligence and operational insights

Technologies: VB.Net, SSRS , C#
Achievements: Port 80% of the VB stansure system to C# using the API's at the back-end .
Reason For Leaving: Contract Expired

Company: **ABSA (WIMI dept.)**
Period: **Mar 2019 to Aug 2019**
Position: **Senior Software Developer**.

- Maintained and enhanced Windows applications in VB.NET and .NET Core
- Mentor Jnr Developers
- Optimized long-running batch processes using asynchronous programming patterns
- Implemented CI/CD practices using Azure DevOps in Agile environment

Technologies : VB.Net , .Net Core, DevOps ,Agile CI/CD.
Achievement: Convert long-running processes to run much faster and quicker using Asynchronized approach.
Reason For Leaving: Contract Expired

Company: **Fundi Capital**
Period: **July 2018 to Feb 2019**
Position: **Senior Software Developer**.

- Designed and built student payment system with merchant integration using microservices
- Developed SSRS reports for business intelligence and operational insights
- Created external integration APIs to support student financial services
- 3rd line support

Technologies: C# , Core , Web API, Agile ,Microservice, Azure Cloud management system (RDMS).
Achievement : Using .Net Core to build azure microservices.
Reason For Leaving: Contract Expired

Company: **Investec Bank** (South African Financial Bank Sector)
Period: **January 2018 to May 2018**
Position: **Senior Microsoft Software Developer**.

- Provided 2nd-line operational support for compliance department systems
- Resolved critical system issues and implemented fixes to ensure business continuity
- Collaborated with stakeholders to maintain regulatory compliance systems

Technologies: Microsoft .Net framework, SQL server ,Agile.
Reason For Leaving: Contract Terminated

Company: **Transactional Capital Recovering** (Debt Collection Sector)
Period: **March 2017 to December 2017**
Position: **Senior Delphi / Microsoft Full-Stack Software Developer**

- Led migration of legacy Delphi applications to modern .NET web platform
- Integrated with South African banking systems for customer payment history retrieval
- Developed BI dashboards and reports using SQL Server SSIS and SSRS

Technologies: Delphi, SQL , C# , OOD & OOA , SSRS
Reason for Leaving: Career Advancement

Company**: Integration Integrated Solution (PTY) Ltd** (Government Sector)
Period**: July 2016 to February 2017**
Position: **Senior C# Developer**

- Built Inmate Information Management System for SA Correctional Services

Technologies: SQL server, Bio-Metric, Geo-Location and Microsoft Smart client.
Reason for leaving: Contract Expired

Company: **Avbob Mutual Insurance Society** (Insurance Sector)
Period: **October 2013 to June 2016**
Position: **Senior Web Developer**

- Responsible for developing web applications for policy holders and company branches across south Africa, and internal business departments.
- Integration between mainframe systems via technologies such as Entire-X ESB.
- Applying the latest Microsoft technologies such as MVC web development.
- Liaises with systems analysts to build and enhance existing systems within the company.
- Project planning of new and existing systems development.
- System architectural decision making related to the new system development.
- Utilising Microsoft technology tools (i.e. Visual Studio) and SQL server.
- Dashboard and reports building utilising SQL reporting services.
- Data scraping from external data sources from South African Banks for the policy holder's payments.
- Technical lead on policy holder web application project.

Technologies: C#, SQL m Entire-X ESB
Achievement: Modernised solution to web UI MVC
Reason for leaving: Career Growth

Company: **Standard Bank (Financial Sector)**
Period: **March 2012 to September 2012**
Position: **Senior Software Developer Consultant**

- Business Intelligent system development using reporting and SSIS on SQL Server market risk department.
- Web application development to access reports for branches across African and UK.
- Data extraction from external Integrated systems like Murex and RiskWatch data sources.

Technologies: SQL (SSRS, SSIS) ,C#
Reason for leaving: Contract Expired

Company: **University of Johannesburg** (Educational Sector)
Period: **April 2011-February 2012**
Position: **Senior Software Developer Consultant**

- Building internal support web systems for university departments.
- Maintenance of the existing student's portal.
- Back-End with B2B systems development integration with other tertiary institutions.

Technologies: Oracle , C#, Xml API
Reason for leaving: Contract Expired

Company**: T-Systems South Africa** (Government Sector)
Period**: December 2009 – March 2011**
Position: **Senior Software Developer**

- New web system development for the coal management system for ESKOM in South Africa.
- Reports and dash-board development for the coal supply per power stations.
- Member of the architectural committee for the project.
- Assisting with system design and the business process alignment within the newly developed system.
- Integration with SAP modules.

Technologies: C# , Oracle , SQL
Reason for leaving: Career Growth

Company: **Arrivia.Kom** (Government Sector)
Period: **August 2008 to November 2009**
Position: **Senior Software Developer**

- Build web system for the coal management system for ESKOM in South Africa to eliminate fraud in coal contracts.
- Automating the process at the mine weighbridges to auto upload truck coal load against the contract.
- Reports and dash-board development for the coal supply per power stations.
- Member of the architectural committee for the project.
- Assisting with system design and the business process alignment within the newly developed system.

Technologies: C#, SQL (SSIS , SSRS)
Achievement :Building advanced Reposting System and using Smart Client to deploy system to the mines.
Reason for leaning: Contract

Company: **Business Connexion** (IT service provider)
Period: **April 2008 to July 2008**
Position: **Senior C# Consultant**

- Web report development for SASOL company using Sql server.
- Web development for miner assessment system which utilised the mobile technologies like PDA's.
- Junior mentoring
- Technical lead on SASOL reporting project

Technologies: C#, SQL (SSRS)
Achievement: Best new monthly employee after I build the framework related with Window Service application.
Reason for leaving: Contract Expired

Company: **Bond Exchange of South Africa (Financial Sector)**
Period: **August 2007 to March 2008**
Position**: Microsoft C# Developer Consultant**

- Enhancements development of the existing Bond trading system.

Technologies: C#, SQL (SSRS) , design Principles
Reason for leaving: Contract.

Company: **Water and Forestry Department** (Government Sector)
Period: **August 2005 to July 2007**
Position: **Senior Delphi Consultant**

- Mentor Jnr developers
- Web system development for water bore-hole management system.
- Modernisation of Delphi application.

Technologies: Delphi, C# , Informix, Oracle, designed principles
Reason for leaving: Contract.

Company: **Department of Agriculture** (Government Sector)
Period: **October 2004 to June 2005**
Position: **Senior Delphi Developer Consultant**

- System Development for farmers within the South Africa.
- System Analysis of an existing systems within department for enhancement.

Technologies: Delphi , SQL
Reason for leaving: Contract

Company**: Octagon Business Solution**
Period: **June 2004 to October 2004**
Position: **Delphi Developer Consultant**

- Develop credit vetting application with integration to the credit bureaux in South Africa.
- Maintenance of and Clarion system for Ezedeex system (South African companies directory system).

Technologies: Delphi, C++ ,Paradox , SQL , Oracle
Reason for leaving: Career Growth

Company: **Thales Advanced Engineering**
Period**: July 2003 to May 2004**
Position: **Delphi Developer Consultant**

- Building network monitoring systems for the military force for South Africa defence force.

Technologies: Delphi, SQL
Reason for leaving: Contract

Company**: Octagon Business Solution**
Period: **November 1999 to June 2003**
Position: **Delphi Programmer**

- Develop credit vetting application with integration to the credit bureaux in South Africa.
- Maintenance of and Clarion system for Exedeex system (South African companies directory system).
- Maintain C++ Api's to the credit bureaux
- Interactive report development/design in Crystal reports.

Technologies: Delphi , C++ ,Paradox , SQL , Oracle
Reason for leaving: Career Growth

Skills Matrix

Category	Tool	Experience	Level	Comments	Last Used
Development	Visual Studio latest Ver 2022 & 2019 (C# , Core, EF)	25 Years	5	.Net (C#, VB.Net) & .Net Core (C#)	Current
